5. Vermi-compost Project reinitiated on 6th Jan 2022

IMSCD&R has allotted a separate area for vermin compost project. This activity is an ongoing one. During the covid period, the project was halted but as soon as the activities were allowed and the institute started functioning normally this project was reinitiated. It basically has a huge pit wherein biodegradable waste, dry leaves, plants, etc are deposited and converted to manure with the use of earthworms, etc. It is situated near the institute canteen and helps to utilize the waste thus protecting and promoting the environment.
